RECYCLED

ENVIRONMENTAL BENEFITS

OF USING RECYCLED FIBRES

RECYCLED COTTON

55% reduction in water consumption compared to conventional cotton.

35% reduction in greenhouse gas and CO₂ emissions.

62% less energy consumption than conventional cotton.

Conventional cotton uses about **16%** of the world's insecticides and **7%** of pesticides.

RECYCLED POLYESTER

The **energy** needed to make the **rPET** is **less** than what is needed to make the virgin polyester.

Recycling PET to create the fabrics **prevents** it from going to **landfill or oceans**.

Using more recycled polyester **reduces** our dependence on **virgin petroleum** as a raw material.

Fabrics created from recycled polyester can be recycled again and again with no degradation of quality, **minimising wastage**.

RECYCLED COTTON

HOW IT'S MADE

USED COTTON
FABRICS READY
TO BE RECYCLED

FABRICS ARE CUT
INTO PIECES

WE OBTAIN
COTTON FIBRE

THE FIBRE BECOMES
RECYCLED COTTON
